One of the most important and unique qualities of the Goulburn Valley Grammar School is the positive School culture. The culture is one where students feel comfortable to be themselves, where they feel safe and secure, valued and appreciated. It is a culture where there is a focus on, and love of learning and where excellence is valued and nurtured.

Three key pillars are the basis for the School's educational philosophy.

## Our Learning Environment

The School is a community with a positive culture where learning is central to the School's vision and where achievement is valued.

## Caring for our Students

The School recognises that learning and achievement can flourish in an environment where students feel comfortable, safe and where they are each recognised, respected and valued as individuals.

## A Well Rounded Education

Skills such as leadership, teamwork, communication and problem solving combined with personal dispositions such as empathy, confidence and self-discipline can be developed in the classroom but the School's rich co-curricular programme is essential in providing diverse opportunities for nurturing these qualities.
